OTP wants better brakes on bikes

TRANSPORT: The Office of Transport and Traffic Policy and Planning (OTP) wants all motorcycles to be equipped with anti-lock brakes to help reduce road accidents.

OTP chief, Sarawut Songsivilai, said yesterday the agency has held talks with parties including motorcycle manufacturers and it has been initially agreed that the brakes should be a standard feature by 2024.

He said a study will be conducted to determine which engine sizes should have the anti-lock brakes and it should be completed within two years.
